

BIXPO 2020

Bitgaram International Expo
of Electric Power Technology

“ The BIXPO 2019 is believed to have developed a platform where technologies and people in different areas get together, and participants exchange ideas and opinions. Also, the slogan 'Energy Transition and Digital Transformation' reflects how big and deep the BIXPO covers. Exhibits on display are varied from the ones applicable to field operations to sophisticated ideas, including on how to cut down on carbon emissions. And technologies are presented in a way that people from around the world can see and understand how they are integrated, not just confined in one field or format but in a very integrating way - like exhibits, conferences, inventions fair, and others. As a result, it allows us chances of full experience in global energy. KEPCO is rising to be a world leader in innovation. There are things that we can learn from KEPCO, and there're things KEPCO learns from the rest of the world. Considering the cooperation between us relies on digitalization, it's natural KEPCO plays a vital part in the process.

- Anda Ray : EPRI, Senior Vice President ”
